Portable waste compactors

www.werner-weber.com
MPC series

Important features:
- The MPC series waste compactors from Werner & Weber are compact, space-saving, and portable. They are perfect for waste management in small and medium-sized businesses.
- With a large filling opening of up to 2370x1720mm, the MPC series can accommodate high-volume waste materials.
- The waste compactors are user-friendly and easy to operate, thanks to their clear and simple operating procedure.
- They can be used for a variety of waste types, including cardboard, films/foils, compaction of high-volume waste, and recyclables.

| Clear top opening* [mm] | 1440 x 1630 | 1710 x 1720 | 2230 x 1720 | 2370 x 1720 |
| Cylinder with rubber seal and safety limit switch |

Your advantages

- Reduce costs – benefit from the maximum volume reduction of your waste and valuable recycling materials, thus cutting your disposal costs.
- Operator-friendly – the procedure for operating the machine is clear and simple, making the work of your personnel easy as well as safe.
- Big filler aperture 2370x1720mm with the MPC-LAT series – with this JUMBO filler aperture, the Werner & Weber waste compactors are particularly user-friendly. The waste compactor can be filled from the ground, from a loading ramp or through the wall of a building using a waste chute.
- We can offer you a large selection of optional equipment. We have various designs of covers for the filling opening, attachment parts in order to allow the disposal vehicle to be able to compact from either side, discharge doors with seals, remote control of the machine via cable and data plug, fill level and operational status messages via GSM, and much more.
- With an attached or stationary mounted container tipping fixture, filling the waste compactor is made even easier. The automatic filler process makes work easier for your personnel and reduces costs and the time involved.

The large filling opening and the JUMBO filler aperture make the MPC series particularly attractive for waste compaction tasks in waste management and recycling centers.
